

All-in-One Weather Station

Reliable localised remote
weather monitoring with data
to make descisions

Built for low-maintenance remote monitoring

Multiple Data Points

- Rainfall
 - Rain Rate
 - Wind Speed
 - Avg Wind Speed
 - Wind Direction
 - Temperature
 - Humidity
 - Fire Behaviour Index
 - DeltaT
- Addon Sensors Available
- Solar Radiation
 - Particulate Matter
 - Barometric Pressure
 - Ask about others

No Moving Parts

- Ultrasonic for Wind Data
- Radar for Rain Data
- 20W Solar Panel
 - 240V available
- Data every 15min

What's included

Power & Comms Unit

Weather Sensor

**2 inch Crossover
Clamp + U-Bolts**

Know whats happening in the field without being there!

Connectivity & Data

- NB-IoT is double 4G coverage
- Mobile & Desktop Access
- Unlimited users
- Historical Data
- Downloadable Reports
- Custom Alerts
- Access, anywhere you have internet

Common Applications

Smart Agriculture

Irrigation Control

Research Studies

Water Management
